

## LANGUE VIVANTE OBLIGATOIRE : ANGLAIS

Durée : 1 heure

*Avertissement : l'usage de tout système électronique ou informatique est interdit pour cette épreuve.*

L'épreuve comprend deux parties :

**I – Compréhension de l'oral** : 8 points sur 20

**II – Expression écrite** : 12 points sur 20

### **I – Compréhension de l'oral**

- Prenez connaissance des questions.
- Ecoutez l'enregistrement intégralement une première fois.
- Commencez à répondre aux questions
- Ecoute fractionnée : vous allez entendre l'enregistrement de nouveau, qui a été fractionné en deux parties. Répondez aux questions au fur et à mesure et reportez vos réponses sur la copie.

- respectez l'ordre des questions ;
- reportez sur votre copie le **numéro** de la question et la **lettre** correspondant à votre réponse: il n'est pas nécessaire de recopier l'intégralité de la réponse ;
- il n'y a pas de points négatifs ;
- une seule réponse possible par question.

## Première partie : 0'00 → 1'39

### 1. What happened in 2018?

- a. Technology became less addictive, thanks to companies addressing the compulsive use of tech.
- b. Apple's shareholders demanded that the company develop a more aggressive marketing strategy to sell more.
- c. The fear of using technology too much became more acute.
- d. The compulsive use of technology was less a cause for concern than other addictions.

### **Richard Branson says Virgin Galactic will take people to space before Christmas**

The billionaire entrepreneur told CNN this week he is "pretty confident" his space tourism venture can achieve its milestone by the end of the year. (...)

The first few trips to space will be flown by test pilots without anyone else on board. Branson says he will be the first passenger. Eventually, paying tourists will also make the trip. (...) SpaceShipTwo, Galactic's rocket-powered plane, will fly into space after it detaches from beneath the wing of a mothership. It has been thoroughly tested on the ground and at lower altitudes, Branson said. But, the first few flights to space will be "the dangerous ones." The pilots will fly the space plane at 2,300 miles per hour, accelerating to top speed in about eight seconds.

Earlier this year, the company resumed powered test flights of the rebuilt SpaceShipTwo, named VSS Unity. The latest test in July sent the craft to a peak altitude of 32.3 miles. The goal is to send VSS Unity more than 50 miles above Earth.

If Virgin Galactic reaches space before the year is done, it'll put Branson's venture ahead of its direct competitor, Jeff Bezos's Blue Origin. Founded in 2000, Blue Origin also plans to offer paying customers suborbital flights. Galactic could also beat Elon Musk's SpaceX — which has a booming business making unmanned trips to orbit and is gearing up to fly astronauts to the International Space Station next year.

"Safety's all that matters if you're putting people into space," he said. "So none of us will race to be the first." But he added, "Virgin Galactic will be the first."

"Elon's done extraordinary things. We hope to do extraordinary things. Jeff, I'm sure, will do extraordinary things," Branson said. "The demand for space travel, whether it's satellites, putting people into space, is enormous."

The design and flight control systems of SpaceShipTwo were overhauled following a 2014 test flight crash that killed a co-pilot. Branson has said the accident made him question whether to continue pursuing his riskiest business venture. But the company said it received an outpouring of support, including from customers who had reserved \$200,000 to \$250,000 tickets to one day ride in SpaceShipTwo. Hundreds of people are still lined up for a shot. The flight will offer tourists a few minutes of weightlessness and views of Earth's curved horizon.
